Professional Summary

Passionate MCA graduate and aspiring software developer with skills in Python, Java, SQL, and full-stack development. Strengths include Cloud Computing and Big Data Analytics, backed by certifications in Cloud, Big Data, and Java Full Stack. Projects include a Blockchain-based credential system (IEEE ICICI 2025 presentation), and a Student Result Management System. I enjoy learning new technologies and collaborating with teams to build smart, impactful applications.

Education

- Master of Computer Applications
BIG DATA ANALYTICS**
Hindustan Institute of Technology and Science (HITS University), Chennai
Aug 2023 - Jul 2025 | CGPA 8.01
- Bachelor of science
Mathematics, Statistics, Computer Science**
Krishna Chaitanya Degree College, Nellore
(affiliated to Vikrama Simhapuri University)
Jul 2020 - Sep 2023 | CGPA :8.69
- Higher Secondary School (MPC Stream)**
Guthikonda Sreeramulu Junior College,
Jun 2018 - Jun 2020 | CGPA: 6.69
- Secondary School**
Sree Vivekananda High School,
Jun 2017 - Mar 2018 | CGPA: 8.0

Technical Skills

- Programming:** Java, Python, SQL, Java Full Stack Development (Spring Boot, Hibernate, JavaScript, React/Angular)
- Web Development:** HTML, CSS
- Databases:** MySQL
- Cloud & Data:** Cloud Computing, Big Data Analytics
- Tools:** Git, GitHub, Jupyter Notebook, Postman, Excel

Language Skills

- Fluent in English, Telugu, Hindi, Urdu.
- Basic Knowledge of Tamil.

Strengths

- Quick learner with strong programming and analytical skills.
- Effective team player with good communication and problem-solving abilities.

Projects

Student Result Management System

- Developed a web-based prototype for managing student academic results with a focus on clear UI and ease of navigation. Designed structured web pages for student login, marks entry, and result display using HTML and CSS. Enhanced user interface with custom PNG assets (icons for grades, subjects, and reports) to improve visualization and user experience.
- Tools & Technologies:** HTML, CSS, PNG assets, Text File Handling .

Helicert: Blockchain-Verified Credentials for Helicopter Tourism

Presented at ICICI-2025 (IEEE Conference)

- Developed a blockchain-based credential verification system for helicopter tourism to ensure transparency, fraud prevention, and secure transactions. Implemented Random Forest and XGBoost machine learning models on a 5K-record tourism dataset (customer, booking, payment, and feedback data), achieving up to 99% accuracy in customer behavior and booking prediction. Applied preprocessing steps (data cleaning, encoding, normalization, correlation analysis) and performance evaluation metrics (accuracy, precision, recall, F1-score) to validate robustness.
- Tools & Technologies:** Python, Hyperledger Fabric, Scikit-learn, XGBoost, Random Forest, Pandas, Matplotlib, Tourism Dataset (5K entries).

Online Course

- Cloud Computing - NPTEL (Jan-Apr 2024)
- Introduction to Algorithms and Analysis - NPTEL (Jul-Oct 2024)
- Big Data - CodeTech IT Solutions Pvt. Ltd. (Jul-Aug 2024)

Internship

Python Developer Intern - Deeksha Technologies (Jan 2023 - Jun 2023)

- Developed and debugged Python scripts, improving code efficiency and reliability.
- Collaborated on small-scale project modules while following best practices in version control and code quality.
- Gained hands-on experience with testing, debugging, and collaborative development workflows.

Certifications

- Solutions Architecture Job Simulation - Forage (AWS)**
Completed practical tasks in designing scalable architectures and hosting solutions.
- Python 101 for Data Science - IBM Developer Skills Network**
Completed a course on Python fundamentals for data analysis and cognitive computing.
- Software Engineering Job Simulation - Forage (Accenture)**
Completed tasks in architecture, security, programming, testing, and Agile practices.
